. INSPIRATION! .

“Hope is being able to see that there is light
despite all the darkness.”

— Desmond Tutu

Behold this beautiful forest... shades of brown, violet & green. This woodland hides the light in the distant sky... yet, we know it is there. If only we are patient, it will break through the foliage and light our world.

. ART .

Incredible green... this art uses green to convey
hopefulness. Green is the color of life,
renewal, nature & energy.

This part of the spectrum is balanced between the warm,
yellow greens & those toward the cool teal greens. It
represents harmony, growth, safety & the environment.

. INTERIOR DESIGN .
The Energy of GREEN !

Sparkling & Futuristic GREEN !

This Office space works really well because:

- There is an excellent balance between the bright & energetic green dovetailed with crisp white.
- The orderly nature of the books & artwork add to the sophisticated nature of this work area.

. PAPER FLOWERS .

Not paper, but certainly very different! This is an unusual flower that I found. It is all metal, created from a simple tin can. Each blossom is handcrafted from something that would have ended up in a landfill!
[I still love Paper Flowers best!]

. PAINTED FURNITURE .
Make a Statement !

Sometimes you simply need a punch of color to make all the difference in your interior design. Don't hesitate to paint!! It is the least expensive, most impactful decorative decision you could make. The beauty is that if you change your design direction - simply repaint!

With my every best wish...

Life is
a beautiful
ride

It is so therapeutic to write to you each week. Focusing on these words makes me refocus my thoughts on all the things that are truly important!!

When I found this bright green bike with the quote 'Life is a beautiful ride'... I needed to think about it. We never quite know what is going to happen... correct? I try to turn left and need to make a right instead, I shop for Red Delicious apples and end up with Granny Smiths.

Sometimes I simply don't know how the day will turn out. I try to plan, then life tosses a little curve ball my way. I am trying to accept that my day is sometimes a discovery in progress... it makes me so much happier to think of each day being more of an exploration than a planned event. I still have my 'to do' list each day, and I do try to accomplish it; however, if something comes up that is not

on my list, I am trying to go with the flow of the universe.

Life can be a beautiful ride, if I just let it happen a little more naturally. I plan, then I adjust my route.

Please stay safe & healthy! Enjoy your beautiful ride today... wherever it may take you!
...with my every best wish, Barbara
